#### Product Comparison:

Protino<sup>®</sup> Ni-NTA Agarose (MN)

Simulated gel image (left panel): M = standard, L = lysate, E = Eluate

Ni-NTA Agarose (Q)

Electropherogram (right panel): Analysis of eluted purified target protein

**Electropherograms of purified His-tagged aspartase show that Protino<sup>®</sup> Ni-NTA Agarose provides comparable purity as Q's Ni-NTA Agarose**  
Bioanalyzer automated electrophoresis purity analysis of His-tagged aspartase (tetramer 208 kDa, subunit 52 kDa ) purified from *E. coli* with Protino<sup>®</sup> Ni-NTA Agarose (MN) and Ni-NTA Agarose (Q) by Agilent Protein 230 Assay.

\*Binding capacity will vary for each His-tagged protein
