

SUPERIOR Westerns with Immobilon® PVDF transfer membranes

Tired of the limitations of nitrocellulose membrane? Looking to improve your PVDF-based Western blotting results? Achieve superior signal-to-noise ratio and easier handling with Immobilon® PVDF transfer membranes:

- **More robust than nitrocellulose** – PVDF will not crack/curl. It also has low background, superior staining capabilities, and can be re-probed multiple times

- **Immobilon-P PVDF Membrane** – Recommended for most Western blotting, especially proteins >20 kDa Cat #IPVH00010

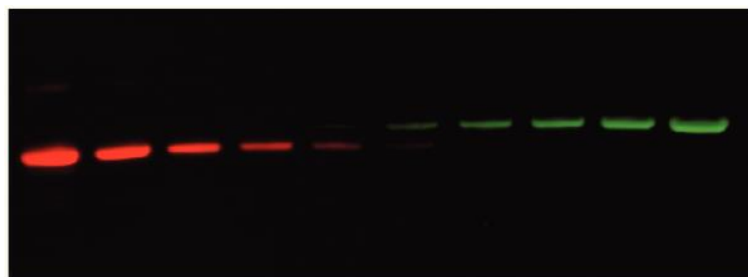

UofT Show special!
Buy 2 rolls of Immobilon
transfer membrane & get
1 roll FREE
2 weeks only!

***Please see below for redemption details.*

To receive your FREE product please
send proof of purchase to Kristina
Hubbard
