Custom 3D modelling and printing!

Information

Whatever your project or idea, we can help bring it to life with our brand new advanced 3D printing facility. Using Fused Deposition Modeling (FDM) we are able to create any design for any project with a range of thermoplastics that are guaranteed to be functional and impress!

Functional prototyping to end-use parts that can withstand autoclaving temperatures, outdoor exposure, chemical exposure and repeated use, our service will provide you with a level of satisfaction like no other.
