

Secondary Antibodies

From Cell Signaling Technology® (CST)

HRP, AP, Biotinylated™, Alexa Fluor® and DyLight™

For your convenience, Cell Signaling Technology® (CST) offers a wide selection of secondary antibodies, chemical modulators, and detection reagents, as well as standard buffers and experimental controls. These same reagents are also used in-house for antibody validation in applications including western blotting, immunohistochemistry, flow cytometry, and immunofluorescent analysis and therefore work optimally with our primary antibodies.
