

New Product Launch!

NucleoType Mouse pCR

The New NucleoType Mouse PCR kit enables animal-friendly and rapid mouse genotyping by offering a shorter protocol paired with one of the fastest PCR enzymes. Applicable to direct PCR from unpurified and undiluted samples including animal hair.

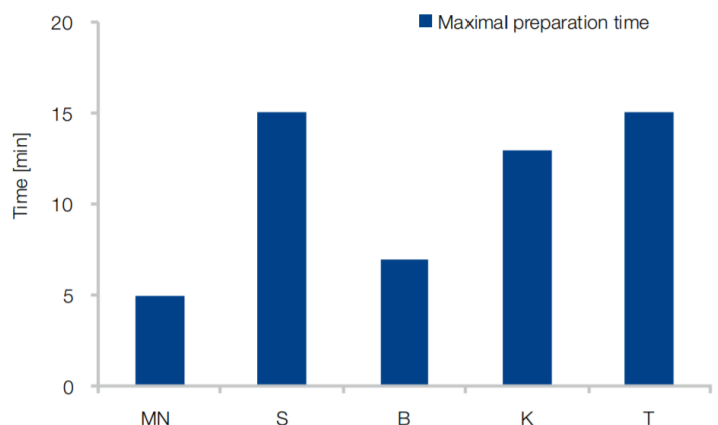

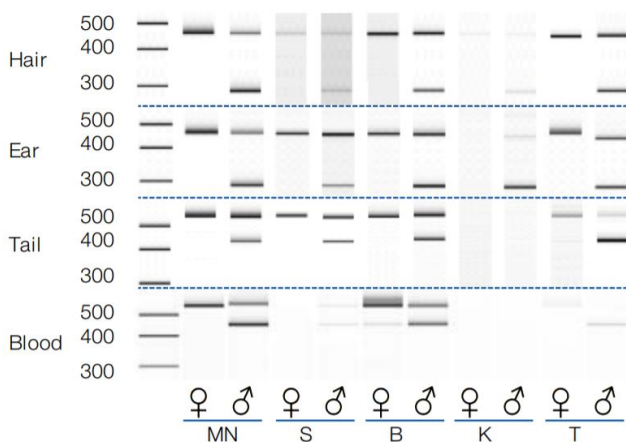

Best part: This new Kit surpasses the competitors in both performance and flexibility*

Features

- Preparation time: 5 minutes
- Shorter lysis incubation
- NO need to centrifuge the lysate
- Designed for tail, ear, blood, and even hair samples
- Single-tube workflow with fast HotStart PCR

25 rxns	MN-743200.25
100 rxns	MN-743200.100
500 rxns	MN-743200.500

Application Data

Superior PCR results displaying strong bands within 30 minutes

Fast and cost efficient sample preparation
