

GB-Magic™ Protein A-G

Immunoprecipitation Magnetic Beads

10% OFF

- ✓ Low background- little non-specific binding and no need for pre-clearing
- ✓ Reproducible- uniform beads ensure the most consistent results
- ✓ Highly sensitive- ideal for ChIP and IP, of low-abundance proteins
- ✓ Convenient- <40 minute protocol, no-centrifugation or pre-clearing steps
- ✓ Validated- high performance for IP, Co-IP, pull-down, and ChIP assays; both for manual and automated protocols
- ✓ Use less antibody- smooth outer surface of the beads, reducing antibody cost
