# In *vitro* transcription & mRNA synthesis kits

NOW AVAILABLE  
AT MEDSTORE

Superior performance and convenience with NEB's HiScribe T7 mRNA Kits.

## HiScribe™ T7 High Yield RNA Synthesis Kit (#E2040)

Is an extremely flexible system for in vitro transcription of RNA using T7 RNA Polymerase. The kit allows for synthesis many kinds of RNA including internally labeled and co-transcriptionally capped transcripts.

- Each kit can yield up to 9 mg of RNA
- Up to 180 µg of RNA per reaction from 1 µg of control template
- Enables full substitution of NTPs for labeling and incorporation of modified bases
- Linearized control template included for verification of RNA synthesis

50 reactions ~~\$384~~ **\$254.80**

## HiScribe™ T7 Quick High Yield RNA Synthesis Kit (#E2050)

Is designed for quick set-up and production of large amounts of RNA in vitro. The reaction can be set up conveniently by combining the NTP buffer mix, T7 RNA Polymerase mix and a suitable DNA template.

- Up to 180 µg of RNA generated per reaction, from 1 µg of control template
- Master mix format reduces pipetting steps while still enabling partial substitution of NTPs for labeling and incorporation of modified bases
- Template removal and RNA purification reagents included

50 reactions ~~\$445~~ **\$311.49**

## HiScribe™ T7 ARCA mRNA Kit (with tailing) (#E2060)

Is designed for quick production of ARCA capped and poly(A) tailed mRNA in vitro. Capped mRNAs are synthesized by co-transcriptional incorporation of Anti-Reverse Cap Analog (ARCA, NEB #S1411) using T7 RNA Polymerase.

- Generate up to 25 µg of capped and tailed mRNA per reaction
- mRNA capping, DNA removal, mRNA tailing and purification complete in 2 hrs. Competitive products have more pipetting steps and separate components.
- Enables partial incorporation of 5mCTP, Pseudo-UTP and other modified CTP and UTP

20 reactions ~~\$682~~ **\$421.40**

## HiScribe™ T7 ARCA mRNA Kit (#E2065)

Can be used to synthesize capped and tailed mRNAs. The cap structure is added to the mRNA by co-transcriptional incorporation of Anti-Reverse Cap Analog (ARCA) (NEB #S1411) using T7 RNA Polymerase.

- Generate up to 20 µg of capped mRNA per reaction
- mRNA capping, DNA removal, mRNA tailing and purification complete in 2 hrs. Competitive products have more pipetting steps and separate components.
- ARCA-based capping in correct orientation ensures high translation efficiency

20 reactions ~~\$515~~ **\$359.10**

## HiScribe™ SP6 RNA Synthesis Kit (#E2070)

Is designed for the in vitro transcription of RNA using SP6 RNA Polymerase. This kit is suitable for synthesis of high yield RNA transcripts and for incorporation of cap analogs (not included) or modified nucleotides (not included) to obtain capped, biotin-labeled or dye-labeled RNA.

- Generate over 80 µg RNA per reaction
- Enables full substitution of NTPs for labeling and incorporation of modified bases
- Template removal and mRNA purification reagents included

50 reactions ~~\$445~~ **\$311.49**

## HiScribe™ T7 mRNA Kit with CleanCap Reagent AG (#E2080)

Is formatted with individual vials of NTPs and CleanCap Reagent AG to allow for partial or complete substitution of modified NTPs, with a total kit yield of 1.8 mg of mRNA. Cap-1 mRNA synthesized from this kit is suitable for many applications, including transfections, microinjections, in vitro translation, preclinical mRNA therapeutic mRNA studies as well as RNA structure and function analysis.

- Generate up to 90 µg of Cap-1 mRNA per reaction from 1 µg of control template
- NTPs are provided separately to enable partial or full substitution of modified NTPs
- Template removal and RNA purification reagents included

50 reactions ~~\$882~~ **\$617.40**

See other side for recommended HiScribe RNA synthesis kits by application.

\*TERMS & CONDITIONS: Offer valid in Canada only. Expires March 31<sup>st</sup>, 2024. Discount is eligible for products listed on this flyer. Promotion not valid for cash or cash equivalent towards purchase(s). No substitutions. Offer may not be applied to existing, pending or prior orders. Cannot be combined with any other promotion or discount. One or more of these products are covered by patents, trademarks and/or copyrights owned or controlled by New England Biolabs, Inc. ## Recommended HiScribe RNA Synthesis Kits by Application

The HiScribe High Yield RNA Synthesis Kits are ideal for numerous downstream applications. Use the guide below to determine which kit is best suited for your application.

		T7 KITS					SP6 KITS
	APPLICATION	HISCRIBE T7 HIGH YIELD RNA SYNTHESIS KIT (#E2040)	HISCRIBE T7 QUICK HIGH YIELD RNA SYNTHESIS KIT (#E2050)	HISCRIBE T7 ARCA MRNA KIT (#E2065)	HISCRIBE T7 ARCA MRNA KIT (WITH TAILING) (#E2060)	HISCRIBE T7 MRNA KIT WITH CLEANCAP® REAGENT AG (#E2080)	HISCRIBE SP6 RNA SYNTHESIS KIT (#E2070)
PROBE LABELING	Fluorescent labeling: FAM, Cyanine (Cy) dyes, etc. • Fluorescent in situ hybridization (FISH)		✓				✓
	Non-fluorescent labeling: Biotin, Digoxigenin • In situ hybridization • Blot hybridization with secondary detection • Microarray		✓				✓
	High specific activity radiolabeling • Blot hybridization • RNase protection	✓					✓
	Streamlined high yield CleanCap Reagent AG capped RNA synthesis • Template encoded poly(A) tails • Non polyadenylated transcripts • Transfection • Microinjection • <i>In vitro</i> translation					✓	
mRNA & RNA FOR TRANSFECTION	Streamlined mRNA synthesis with ARCA co-transcriptional capping and enzymatic poly(A) tailing • Transfection • Microinjection • <i>In vitro</i> translation				✓		
	Streamlined ARCA capped RNA synthesis • Template encoded poly(A) tails • Non polyadenylated transcripts • Transfection • Microinjection • <i>In vitro</i> translation			✓			
	Co-transcriptional capping with alternate cap analogs • Transfection • Microinjection • <i>In vitro</i> translation		✓				✓
	Post-transcriptional capping with Vaccinia mRNA Capping System • Transfection • Microinjection • <i>In vitro</i> translation	✓	✓				✓
	Complete substitution of NTPs: 5-mC, pseudouridine, etc. • Post-transcriptional capping with Vaccinia mRNA Capping System	✓					✓
	Partial substitution of NTPs: 5-mC, pseudouridine, etc.		✓	✓	✓		✓
	Unmodified RNA		✓				✓
	Hairpins, short RNA, dsRNA • Gene knockdown		✓				✓
STRUCTURE, FUNCTION, & BINDING STUDIES	Complete substitution of NTPs • Aptamer selection • Isotopic labeling	✓					✓
	Partial substitution of one or more NTPs • Aptamer selection • Structure determination						✓
	Unmodified RNA • SELEX • Structure determination		✓				✓
