DAY

MedStore Show

SOLUTIONS FOR DISCOVERY | FROM SAMPLES TO ANSWERS

Wednesday
October 7, 2026

10:30AM to
1:00PM

University of Toronto

1 King's College Circle,
Medical Science Building, 1st Floor

Cell Biology WORKFLOWS

From cell culture to
imaging and analysis.

- Cell culture reagents and plastics
- Live and fixed cell imaging
- Cell analysis and characterization
- Solutions for 2D and 3D models

Molecular Biology WORKFLOWS

From nucleic acid extraction
to genetic analysis.

- DNA/RNA extraction and purification
- PCR, qPCR and digital PCR
- Gene expression analysis
- Sequencing library preparation
- Cloning and molecular biology reagents

Protein Analysis WORKFLOWS

From protein expression
to characterization.

- Protein expression and purification
- Western blotting and immunodetection
- ELISA and multiplex assays
- Mass spectrometry and proteomics
- Protein quantification and analysis
